CONSENT TO LASER/LIGHT ENERGY TREATMENT NAME _____ DATE of BIRTH _____ ADDRESS _____ CELL WORK PHONE _____ PHONE ____ EMAIL ____ **SKIN TYPE**: Review the Fitzpatrick Scale skin types below and check the one that best describes your skin. This information will help your technician determine the most appropriate way to approach your treatment(s): □ I. Very fair skin; blonde or red hair; light ☐ IV. Mediterranean Caucasian skin; medium to colored eyes; freckles common. heavy pigmentation. □ II. Fair skinned; light hair, light eyes. ☐ V. Mideastern skin; rarely sun sensitive. ☐ III. Common skin type; fair; eye and hair color ☐ VI. Black skin, rarely sun sensitive. vary. Are you of Asian heritage (Class V) and/or have a history of keloid scarring? ☐ Yes □ No TECHNICIAN: PROCEDURE(s):

I elect to receive the laser/light energy system procedure(s) indicated above for the stated benefit intended. I understand that outcomes may vary, including 1) good results in one session; 2) good results but only after additional sessions; 3) no results; and in rare cases 4) adverse results. I understand that other treatments to enhance outcomes may be recommended, including, but not limited to, the application of skin care products.

BENEFIT INTENDED _____

Pre-Procedure and Aftercare Instructions: I have received, and will strictly adhere to, all pre-procedure and aftercare instructions. I understand that for those with more color in the skin, it is advised to use a lightening agent leading up to the procedure to suppress the melanin in the skin. I understand there may be an extended period of recovery following the procedure(s), and that aftercare compliance is crucial for healing, prevention of scarring, hyper-pigmentation and hypo-pigmentation. I understand that particularly avoiding sun exposure after the procedure is crucial to reduce the risk of color change and will always apply a broad spectrum SPF 25 or higher, as recommended by my technician. I understand that initially, the skin treated may be red and swollen,

that fine, thin scabs may form, and that the healing process typically takes anywhere from one to three weeks. However, I am aware that in rare cases, depending on my skin sensitivity and recovery capacity, healing could take as long as three to six months.

Warning: Treatment is not available to clients who are on **ACCUTANE and PHOTOSENSITIZING** medications. In addition, clients using **ANTICOAGULANTS** must disclose this to the technician, as treatment may need to be modified to mitigate additional risk associated with the use of these drugs. For women of childbearing age: You confirm that you are not pregnant and do not intend to become pregnant during the course of treatment. Furthermore, you must keep your technician informed should you become pregnant during the course of treatment.

Risks of care: I understand that the following problems may occur with treatment:

- 1. **Scarring**: This treatment can create bruising and a moderate burn or blister to the skin. For an effective treatment, the power (joules) needs to be just below the blistering point which means the skin will be red. There is a risk of scarring.
- 2. **Pigmentation**: The treated area may become either lighter (hypo-pigmented) or darker (hyper-pigmented) in color. This is rare and is usually just temporary, however may become permanent.
- 3. **Infection**: Although infection following this treatment is unusual, bacterial, fungal, and even viral infections can occur. Herpes Simplex virus infections around the mouth can occur following a treatment, even if there is no past history of Herpes Simplex virus infections in the mouth area. Clients with a history of Herpes Simplex virus in the treated area are encouraged to seek preventative therapy. Should any type of skin infection occur, additional treatment, including antibiotics, may be necessary.
- 4. **Bleeding**: Pinpoint bleeding is rare but can occur following some laser treatment procedures. Should bleeding occur, additional treatment might be necessary.
- 5. **Skin tissue pathology**: Energy directed at skin lesions may potentially vaporize the lesion. Laboratory examination of the tissue may not be possible. Only clearly benign pigmented lesions can be treated. A doctor's clearance should be obtained in the case of this type of treatment.
- 6. Allergic reactions: In rare cases, local allergies to tape, preservatives used in cosmetics or topical preparations, have been reported. Systemic reactions (which are more serious) may result from prescription medicines. Allergic reactions may require additional treatment. Due to skin surface disruption, irritation and histamine reactions may also occur resulting in itching, dermatitis, or other forms of sensitivity.
- 7. **Vision damage**: I understand that exposure of the eyes to light during the procedure could damage vision. I will keep the proper eye protection on at all times.

I certify that this consent has been fully explained to me, that I have read the above paragraphs, and that I elect to receive the laser/light energy procedure(s) indicated above. I understand the various risks associated with the Procedure(s) and the importance of properly following pre-procedure and aftercare instructions to minimize those risks. I consent to my photograph being taken before and after the procedure(s).

Exclusion Criteria from treatment (con Check any of the statements that apply	
	or other implanted electronic device lated by light or heat (such as Herpes Simplex)
	HIV) or use immunosuppressive medications
☐ Sunburns, exposure to sun or article treatment	ficial tanning during the past 3-4 weeks prior to
Hepatitis or liver disease	
☐ High or low blood pressure (with	s, or use of anticoagulants (blood thinning medications) medications)
☐ Epilepsy☐ Hormonal disorders or endocrine	disorders (such as polycystic ovary syndrome or
diabetes), unless under control	
☐ Suffering from Keloid scars or im	paired wound nearing

	Vitiligo or tendency to hypopigmentation
	Current or history of cancer, any cancer drug therapy (such as Ducabaxine,
	Fluorouracil,
	Methotrexate, etc), pre-cancerous lesions or problematic moles
	History of local or recurrent skin infection
	Fragile, extra dry and sensitive skin
	Any active skin disease or inflammation (such as Herpes, Psoriasis, Eczema, rash) in the
	treatment area
	Metal implants in the treatment area
	Undiagnosed lesions in the treatment area
	History or current tattoo or permanent makeup or nevi present in the treatment area
	Use of Accutane (Isotretinoin, Roaccutane) within the past 3-6 months
	Breast-feeding
	Use of photosensitive medication or herbs within 2 weeks prior to treatment (such as
	Isotretinoin, tetracycline, or St. John's Wort)
	Tretinoin – Retin A in the last 2 weeks
	Any synthetic filler procedures (i.e. silicon) in the treatment area. Please note that some
	of the fillers are "heat resistant". In these cases, treatments may start two weeks after
	the filler procedure
	Botox injections in the past 5-7 days
	Chemical peel or natural fillers in the past 2 weeks
	Deep chemical peel / laser peel in the past 6 months
1.	I duly authorize and
	other specially trained personnel of this facility, to perform treatment using light based
	technology systems from Bare Beauty
2.	I do not suffer from Herpes / I suffer from Herpes and I agree to initiate preventive
	treatment with antiviral medications, though I am aware that preventive treatment does
	not ensure total prevention of Herpes appearance during the treatment.
	3. I hereby declare that I was informed in regards to the following:
	5. Thereby declare that I was informed in regards to the following.
	3.1 The versatile treatments available with Bare Beauty light based systems are
	based on a principle called selective photothermolysis. The light emitted and
	absorbed by targeted chromophores (light sensitive molecules) encourages a
	specific biological process to achieve the desired clinical result.

3.2 I have been advised in regards to possible risks and side effects of the

treatments which may include slight pain, erythema, edema, color changes (hyper or hypo- pigmentation), paradoxical unwanted hair growth and burns. All side effects are transient and mild, however in the event of adverse side effects the treating personnel must be informed and a physician consult may be necessary.

- 3.3 I am aware that exposure to sun 3-4 weeks prior and after treatment are contraindicated to the treatment and may promote side effects. I was advised to use SPF30 in between treatments.
- 3.4 I was advised about the use of protective goggles and I agree to wear them throughout the duration of the treatment.

My questions regarding this procedure have been answered to my satisfaction. I accept all risks of treatment and agree to provide aftercare as directed by this facility.

This consent was accepted by me, after I explained to the client all the above and I confirm that all of my explanations were understood by her/him.

CANCELLATION/NO-SHOW POLICY

If you are unable to make your appointment, we kindly ask that you call 24 hours in advance to avoid a cancellation fee. Cancellations less than 24 hours in advance will result in a \$30 fee and no-show appointments will be charged the total amount of service missed. You receive a reminder text as a courtesy, but it is your responsibility to call if you need to cancel or reschedule and to make sure it's not within 24 hours of your appointment or you will be charged.

If you are more than 15 minutes late to your appointment, you may need to reschedule to accommodate other clients that are scheduled after you.

A credit card or debit card is required to reserve your appointment. The card will be charged only if there's a failure to follow our cancellation policy.

Thank you for	your	understanding,
